OOP mit Java Objekt

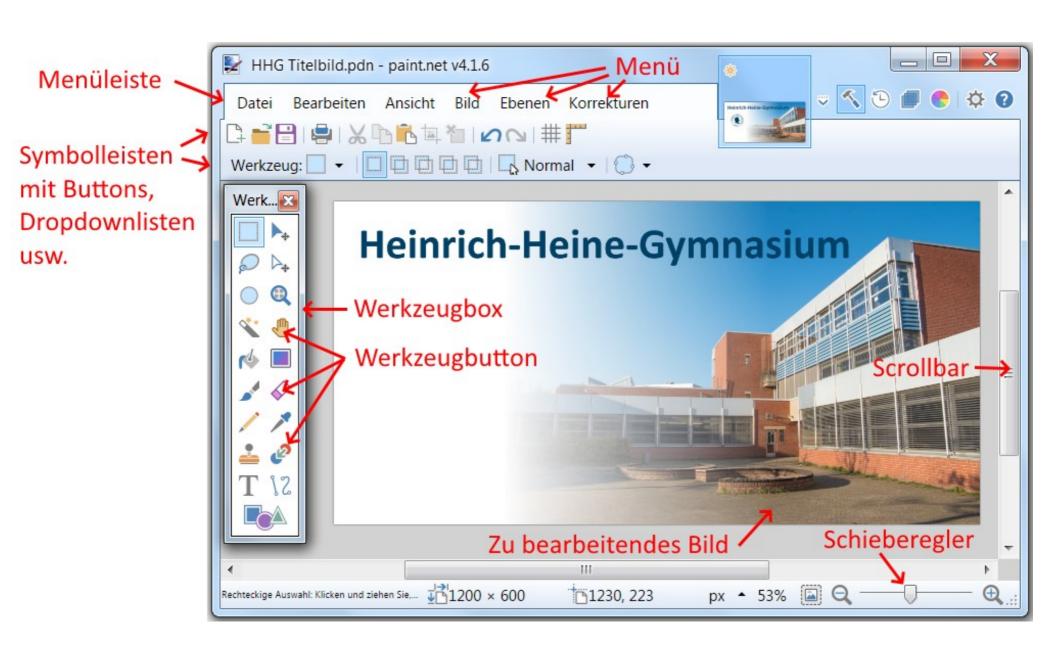

Objekt

- Begriff "Objekt" ist sehr allgemein
- Objekt = Gegenstand, der im Programm eine Rolle spielt
- Beispiele für Objekte
 - Graphische Elemente (Menüs, Buttons, Dialoge, ...)
 - Dinge, die der Benutzer bearbeitet (Texte, Bilder, Produkte, Kundenprofile, ...)
 - Programmkomponenten
 (Drucker- und Netzwerkschnittstelle, ...)

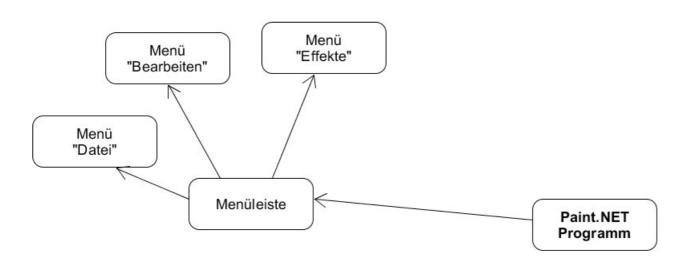

Beispiel: Paint

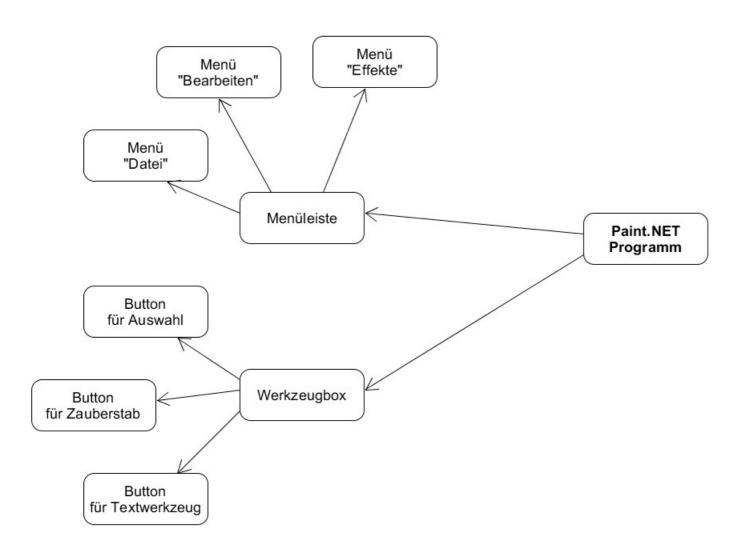

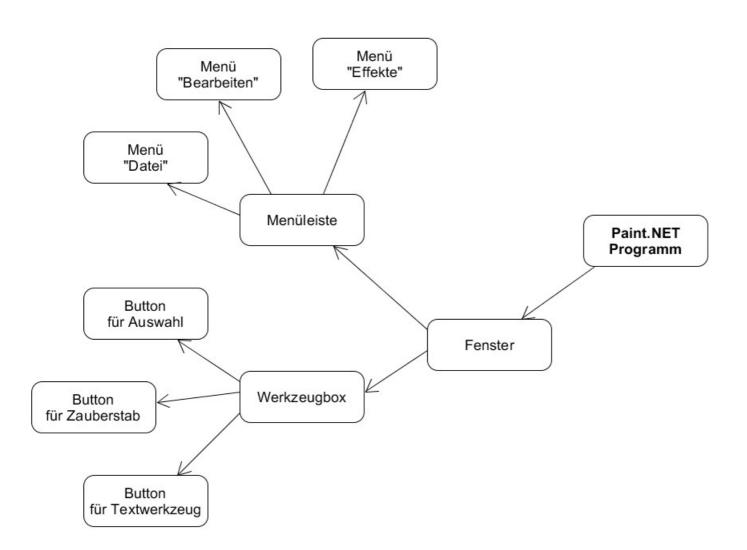

Beispiel: Paint

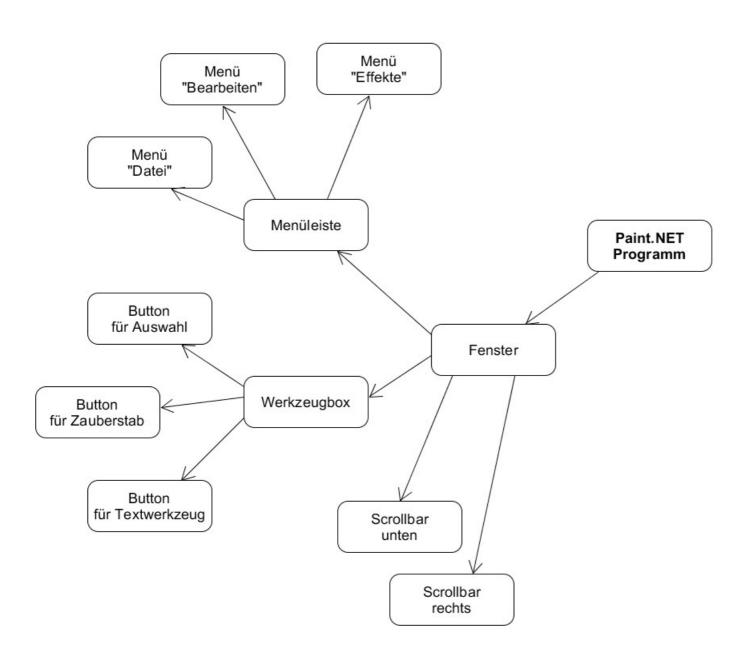

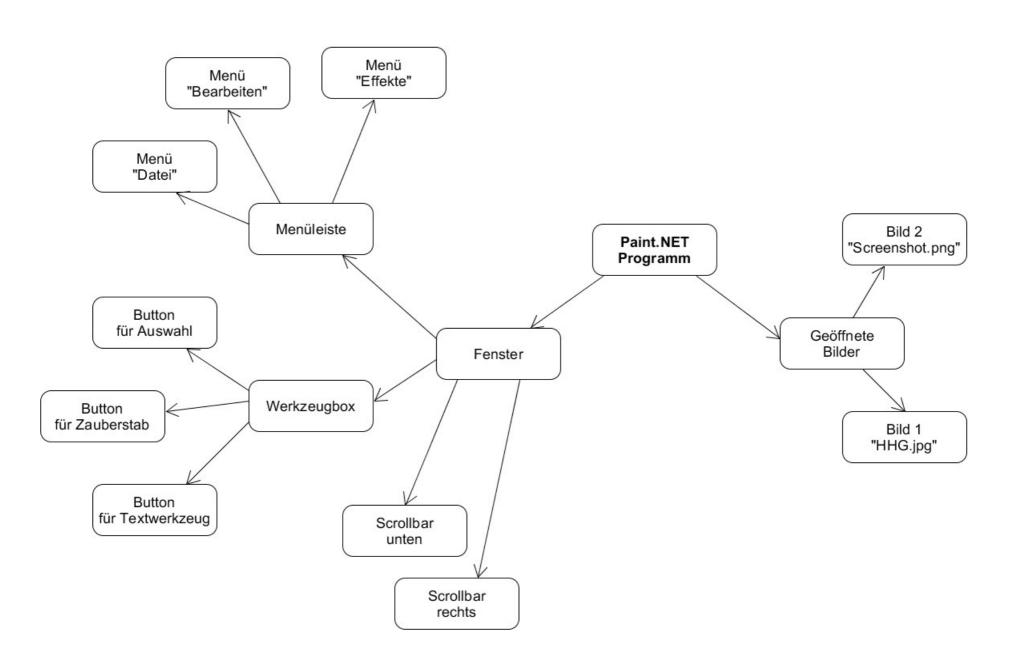

Paint.NET Programm

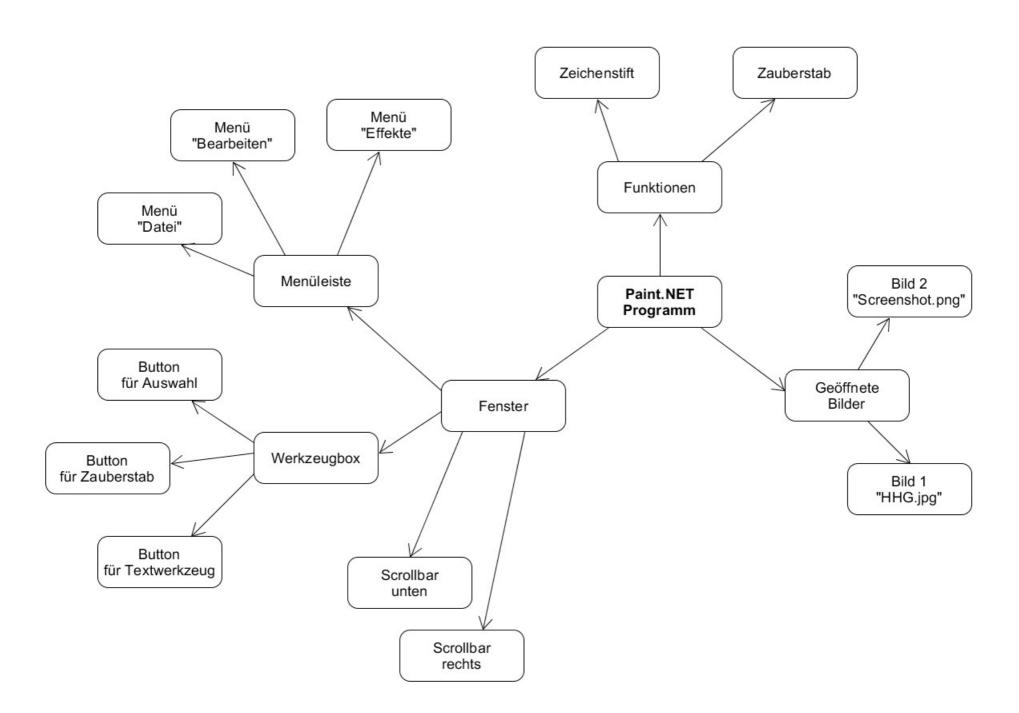

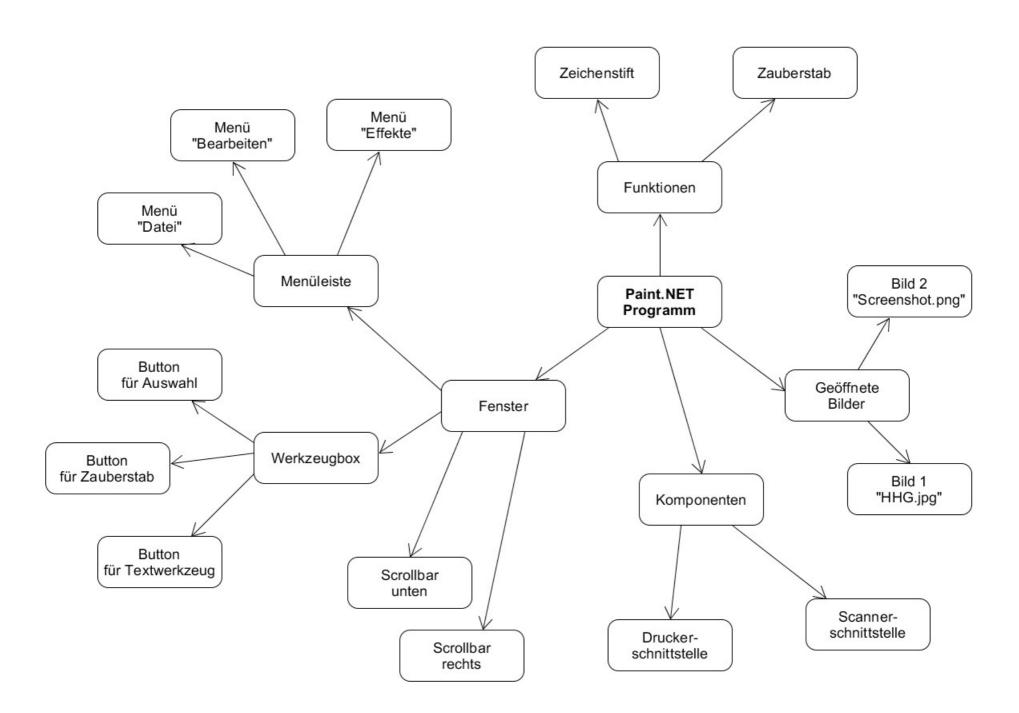

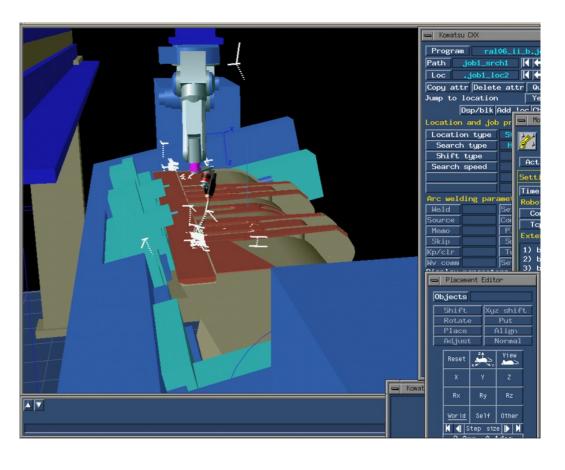

Beispiel: Industrieroboter

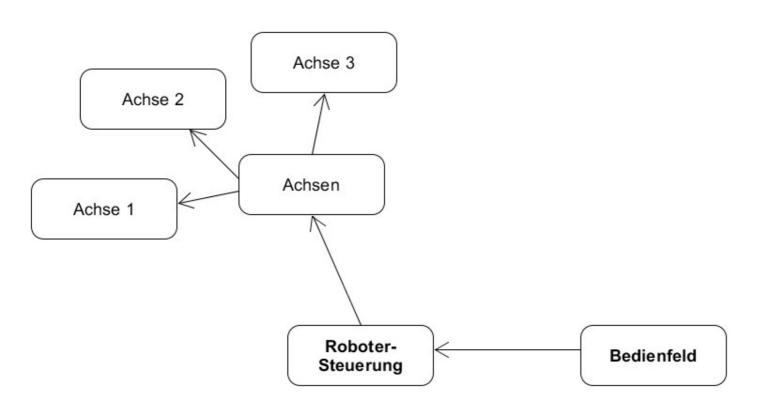

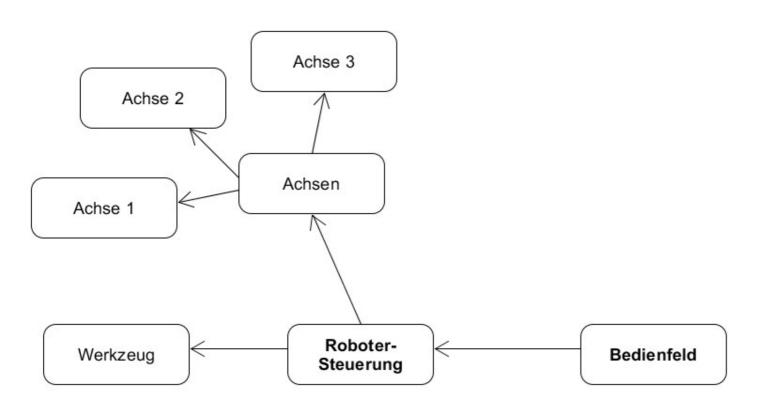

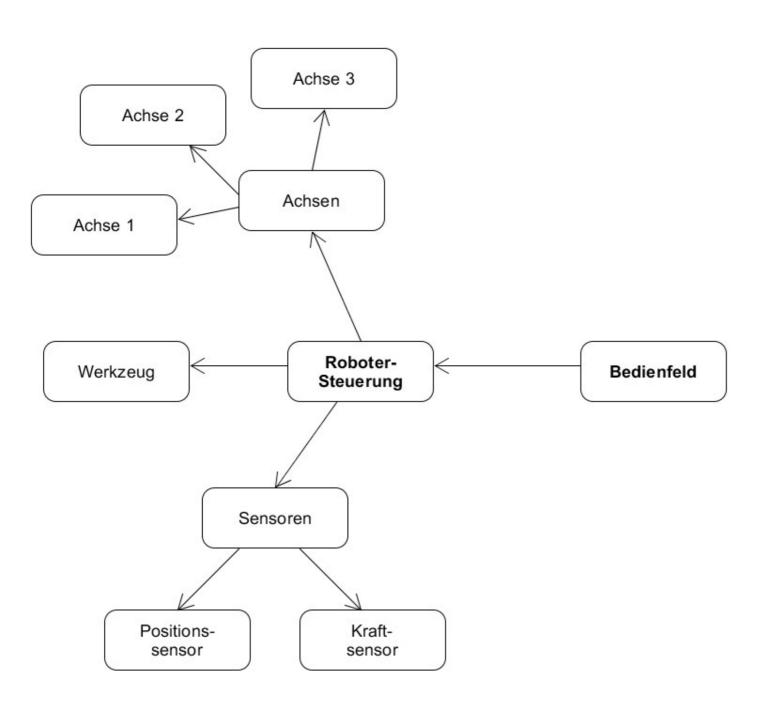

Roboter mit Steuerungssoftware "Bedienfeld" zur Programmierung Roboter-Steuerung

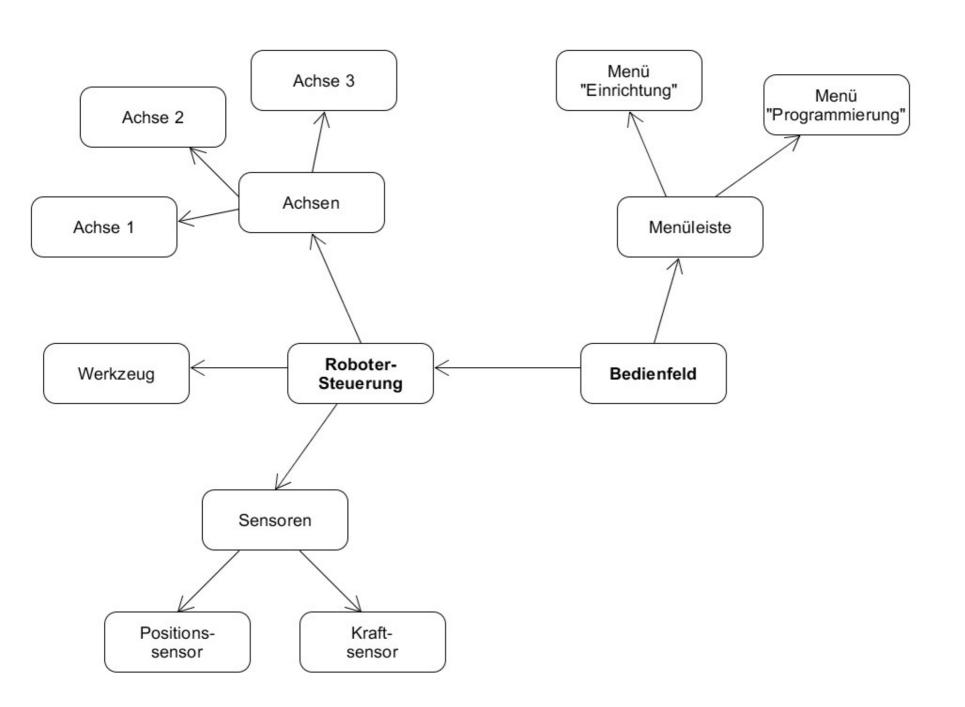

Bedienfeld
